This course is for you if you want to:

- Understand sensory development from conception through early childhood.
- Explore how early sensory experiences influence neurobiology, behaviour, and development.
- Gain practical tools to enhance assessments, interventions, and outcomes.
- Learn to create sensory-rich environments that support sleep, feeding, play, learning, and parent–infant bonding.
- Access a clear framework and clinical reasoning tool to guide practice.

✨ Includes FREE monthly mentoring sessions to help you integrate your learning into everyday practice.
